

The Ministry of Energy of Georgia has announced the interest expressions of the Design and Feasibility Assessment of Optimal Scheme of Medium-Size Hydropower Plants. Based on the information of the ministry of Energy of Georgia, Engurhesi Ltd intends to announce a tender on consulting services for the Design and Feasibility Assessment of Optimal Scheme of Medium-Size Hydropower Plants on River Khrami. Within the frameworks of consulting services the works under the consultancy assignment are planned to be performed in two stages: Feasibility Assessment of the selected scheme of HPPs including Environmental Impact Assessment. Interested companies are invited to present the interest expressions letter. Based on this invitation, there will be sent the formal invitations to several qualified companies in order to express its tender proposals.
