

Construction of new hospital is underway on Bagrationi street in Batumi. Multi-functional clinic for 92-beds will have radiology, angiography, surgery, cardiology, intensive care units, cardiovascular, neonatal resuscitation, laboratories. 20 million USD will be invested in the hospital's construction and 180 persons will be employed there. The company "System Insaat" plans finishing of construction in April 2013. The management of the clinic will be given to the well-known Turkish company "Medicana Group." Chairman of Ajara government has observed ongoing construction works. According to Archil Khabadze, executive government actively supports investment projects ongoing in the region.
