

In 2021, Georgia's exports increased by \$ 900 million (27%) to 4.2 billion. China is still in the first place in exports, where 615.6 million goods were exported. Exports to China increased by 29%. Exports to Russia increased by 38% at a higher rate and reached \$ 610 million, as a result of which Russia left Azerbaijan and became the second largest export market of Georgia. During this period, Georgia's main exports were copper ores and concentrates, which sold the country \$ 815 million, accounting for 19% of total exports. Ferroalloys came in second with \$ 477 million in exports, followed by re-exports of automobiles with \$ 456 million. BM.ge requested from Geostat a list of the 20 companies that exported the most valuable goods from Georgia last year. For reference, it is not sorted according to the rating of exporting companies:
